DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of group I invention (claims 1-19 and 23-28) in Paper filed on 3/25/2004 is acknowledged. The traversal is on the ground(s) that applicants reserve the right to seek rejoinder of the method claims of group II. This is not found persuasive because the claimed method is not a method of use.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-19 and 23-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Komoto (4,069,272).

Komoto discloses a linear alpha-olefin dimer (the abstract; namely column 2, lines 8-30).

The examiner notes that the dimer is made from linear C3-C6 alpha olefins (col. 2, lines 25-29).

It is noted that applicants' claimed product is a product-by-process. Although the cited reference does not teach the process steps as recited, these process steps are however not given patentable weight since the invention in a product-by-process claim is a product, NOT a process.

Art Unit: 1764

In re Bridgeford, 357 F2d 679; 149 USPQ 55 (CCPA 1966). It is patentability of the product claimed and NOT of the recited process steps which must be established. *In re Brown*, 459 F2d 531; 173 USPQ 685 (CCPA 1972).
